Who Should Attend:

Persons wishing to learn more about the UGC approved BIA (Beef Image Analysis Software) and the International Livestock Image Analysis centralized processing lab and people wanting to have a refresher before attending the 2009 UGC Certification process.

This is for all ranchers or technicians certified or not to learn more about the new software and proper scanning techniques for collection of 12-13th rib fat thickness, ribeye area, percent intramuscular fat and rumpfat. Attendees will be presented information necessary for participation in the Annual Proficiency Testing and Certification (APTC) process to be held in the summer and fall of 2009. Additionally, participants will be trained to use the UGC approved Beef Image Analysis (BIA) software for collection of images necessary for the centralized ultrasound processing laboratory of International Livestock Image Analysis Lab (ILIA).

Designer Genes Technologies, Inc.

This is a 1 day DG certification that if the tech is proficient at collecting and interpreting images will be allowed to purchase or upgrade to the new automated BIA Pro Plus or BIA Feedlot program.

Cost:

\$500.00 per person for the Beef Cattle Ultrasound Short Course payable in advance.

This class is limited to 12 people.

\$250.00 per person for the Designer Genes Technologies, Inc. BIA Certification
